IN THE DRAWING:

Enclosed herewith, in separate letters, to the Official Draftsperson and proposed corrected Figure 1 a shown in red.

REMARKS

Applicant's attorney acknowledges with appreciation the telephone interview of 11/14/2002 initiated by the Examiner. In the interview the Examiner advisee that allowable subject matter was disclosed in the combination of the features of a magnetic resonance device, means for acquiring a magnetic resonance signal and means for providing a flow of air into a space that is non-magnetic or non-metallic.

The Abstract is objected to as being incomplete. Enclosed is an amended Abstract that satisfies MPEP § 608.01(b).

The drawings are objected to because of unlabeled blank boxes. Enclosed herewith in accordance with MPEP §§ 608.02(r) and 608.02(v) is a separate letter to the Official Draftsperson and a proposed correction as shown in red for Figure 1. In the proposed correction all unlabeled blank boxes except for the features indicated by reference numerals 181 and 191 have been labeled as requested by the Examiner in paragraphs 2A)-F). In regard to paragraphs 2G) and H), it would be impractical to label the features indicated by reference numerals 181 and 191 as the font size would not comply with official drawing requirements. Furthermore, the features indicated by reference numerals 181 and 191 are not shown as "blank boxes" but are symbols of the features.
